

Busby Patient Testimonial Transcript

Ray Busby: At the first of this year I decided that I would change doctors. So I was talking to a friend of mine and he recommended that I come over to WellMed. I told Dr. Kinney what my problem was with the perspiration, so unusual perspiration. He explained to me what he felt like it might be. I'd never had a doctor that would take the time and patience to tell me what they felt like my medical problem was and explain it to me in a way that I could really understand it. He was patient, he listened to me, did some tests, and he recommended a medication that immediately solved the problem and I haven't had that problem since.
